DISCOVERY & HEALTH

Codebase Intelligence Dashboard

Deep AST parsing, dependency mapping, and health metrics for polyglot systems in seconds.

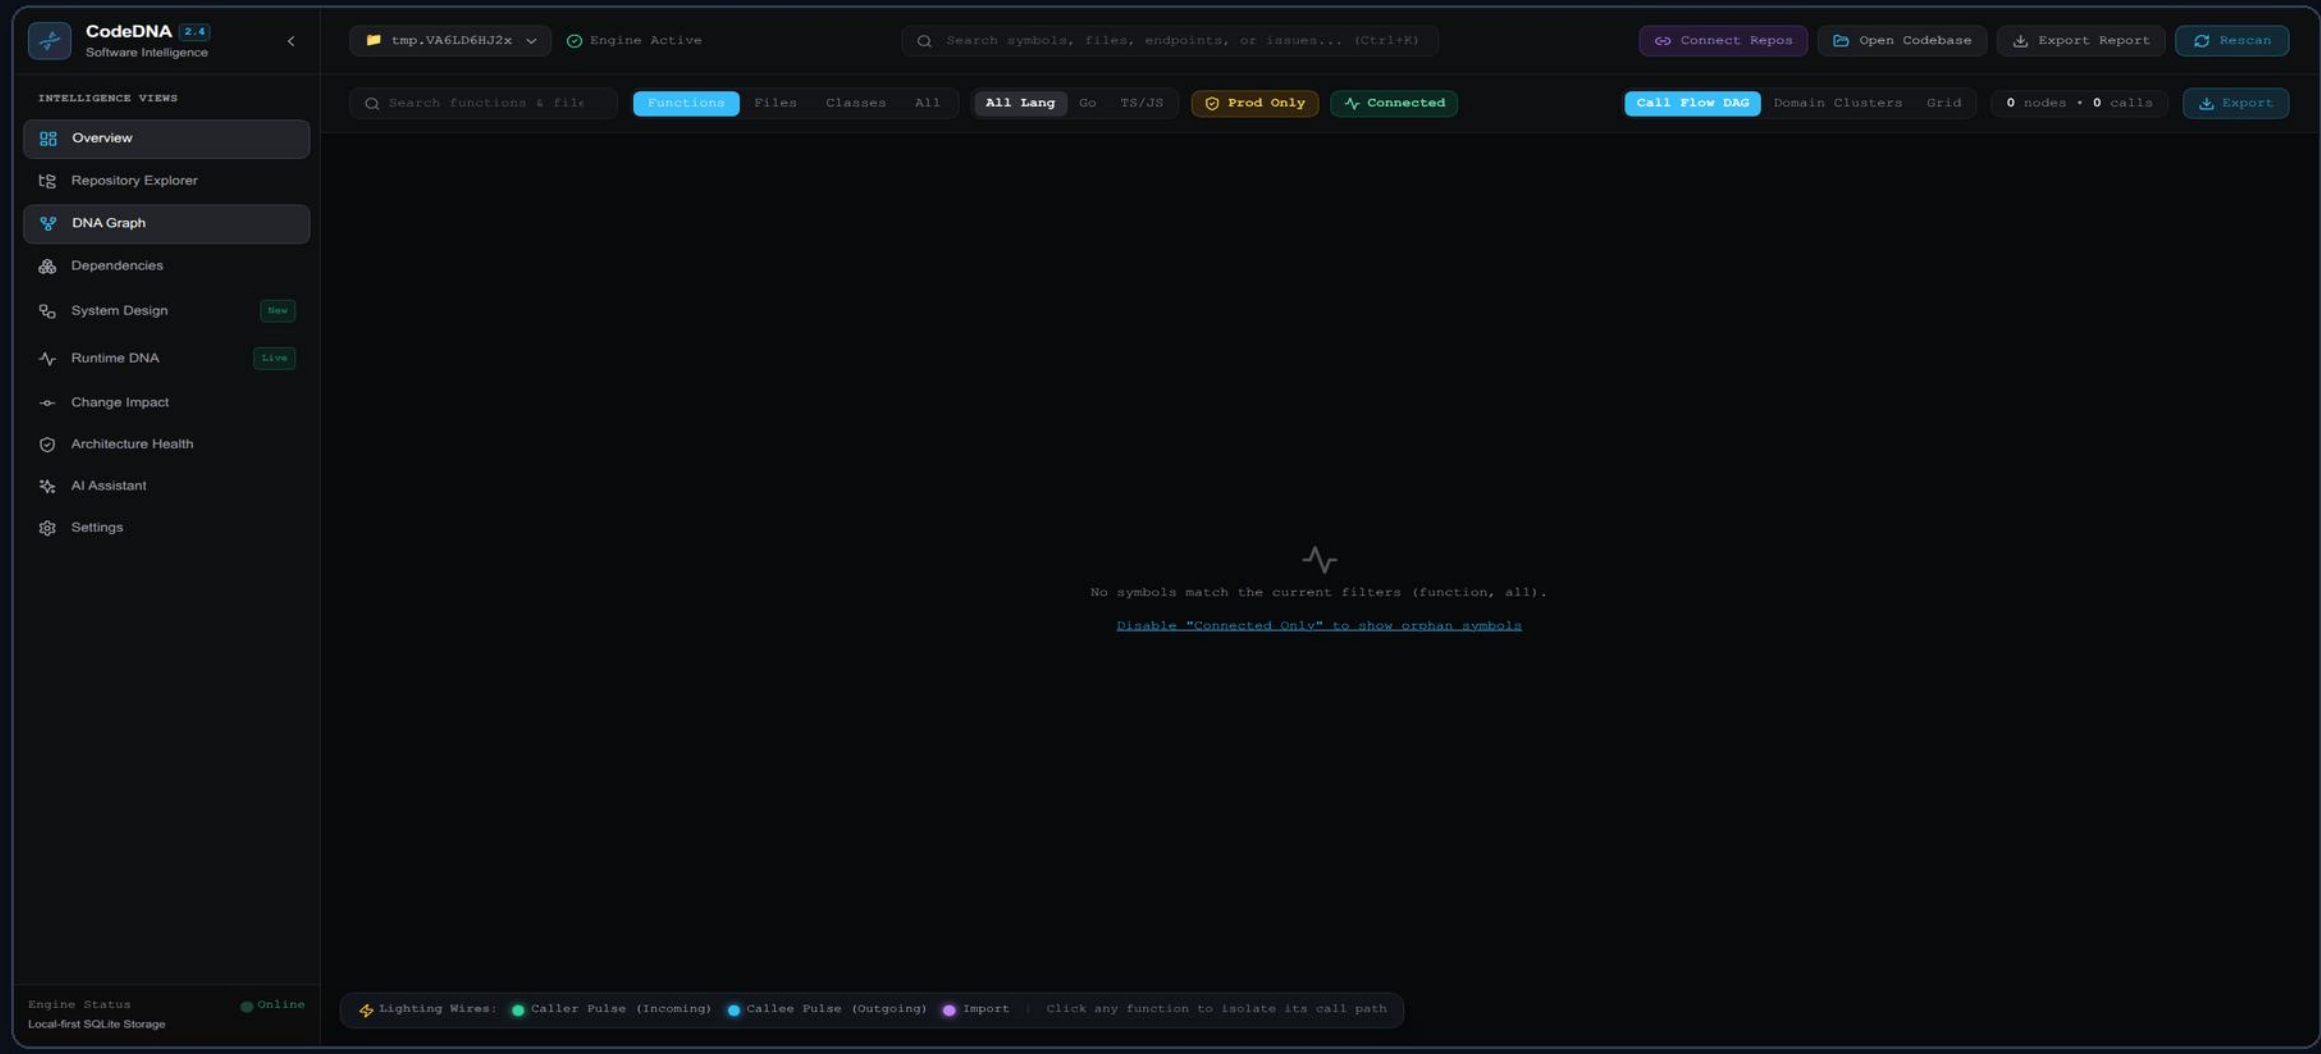

GitHub: github.com/0xzahed/codedna

docker run -d -p 8080:8080 -v $(pwd):/workspace ghcr.io/0xzahed/codedna

INTERACTIVE TOPOLOGY

Living Dependency & Function Call Graph

Real-time invocation paths with animated pulse lighting and circular reference detection.

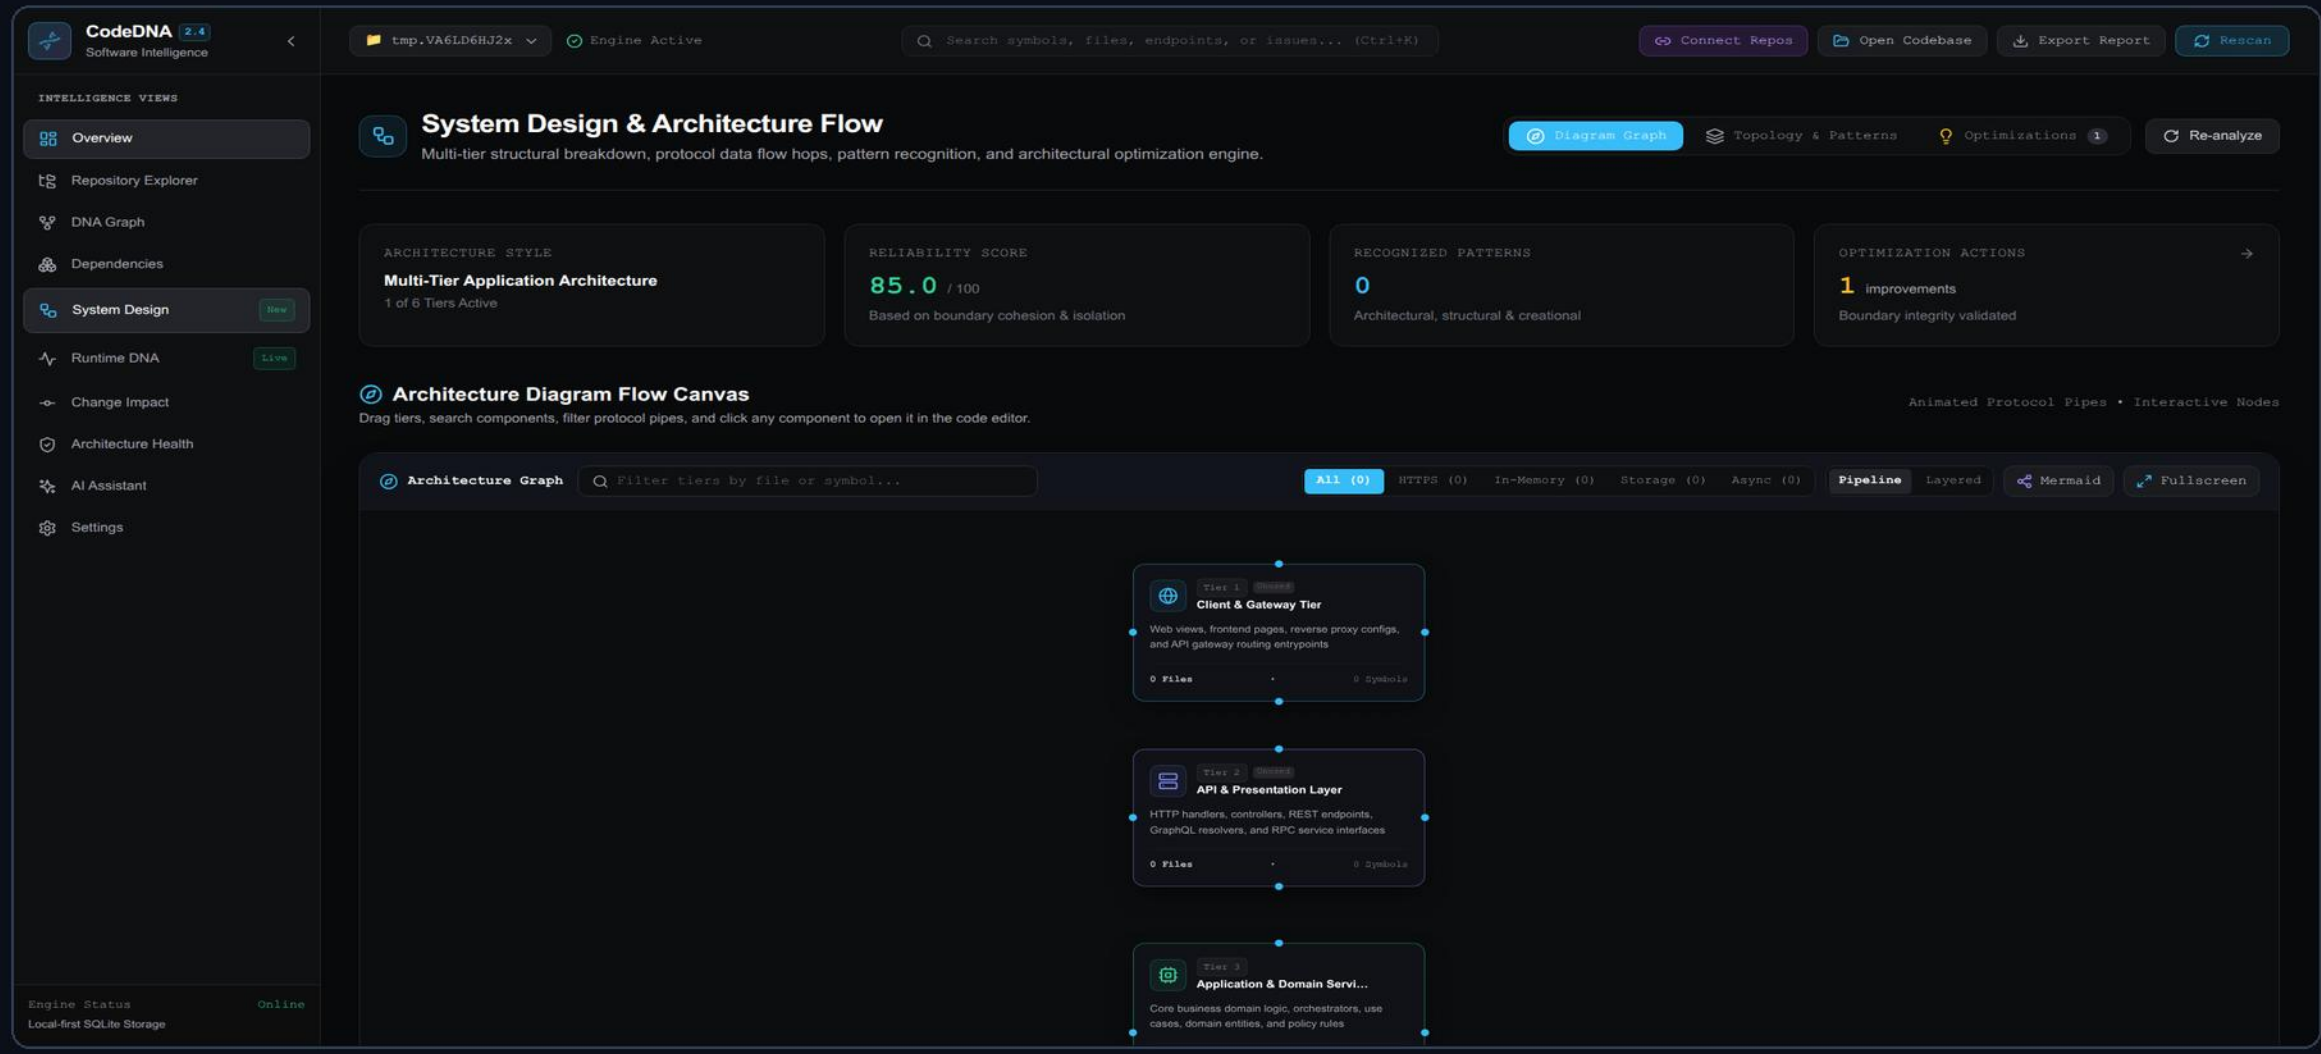

GitHub: github.com/0xzahed/codedna

docker run -d -p 8080:8080 -v $(pwd):/workspace ghcr.io/0xzahed/codedna

MULTI-TIER ARCHITECTURE

Automated System Design & Clean Architecture

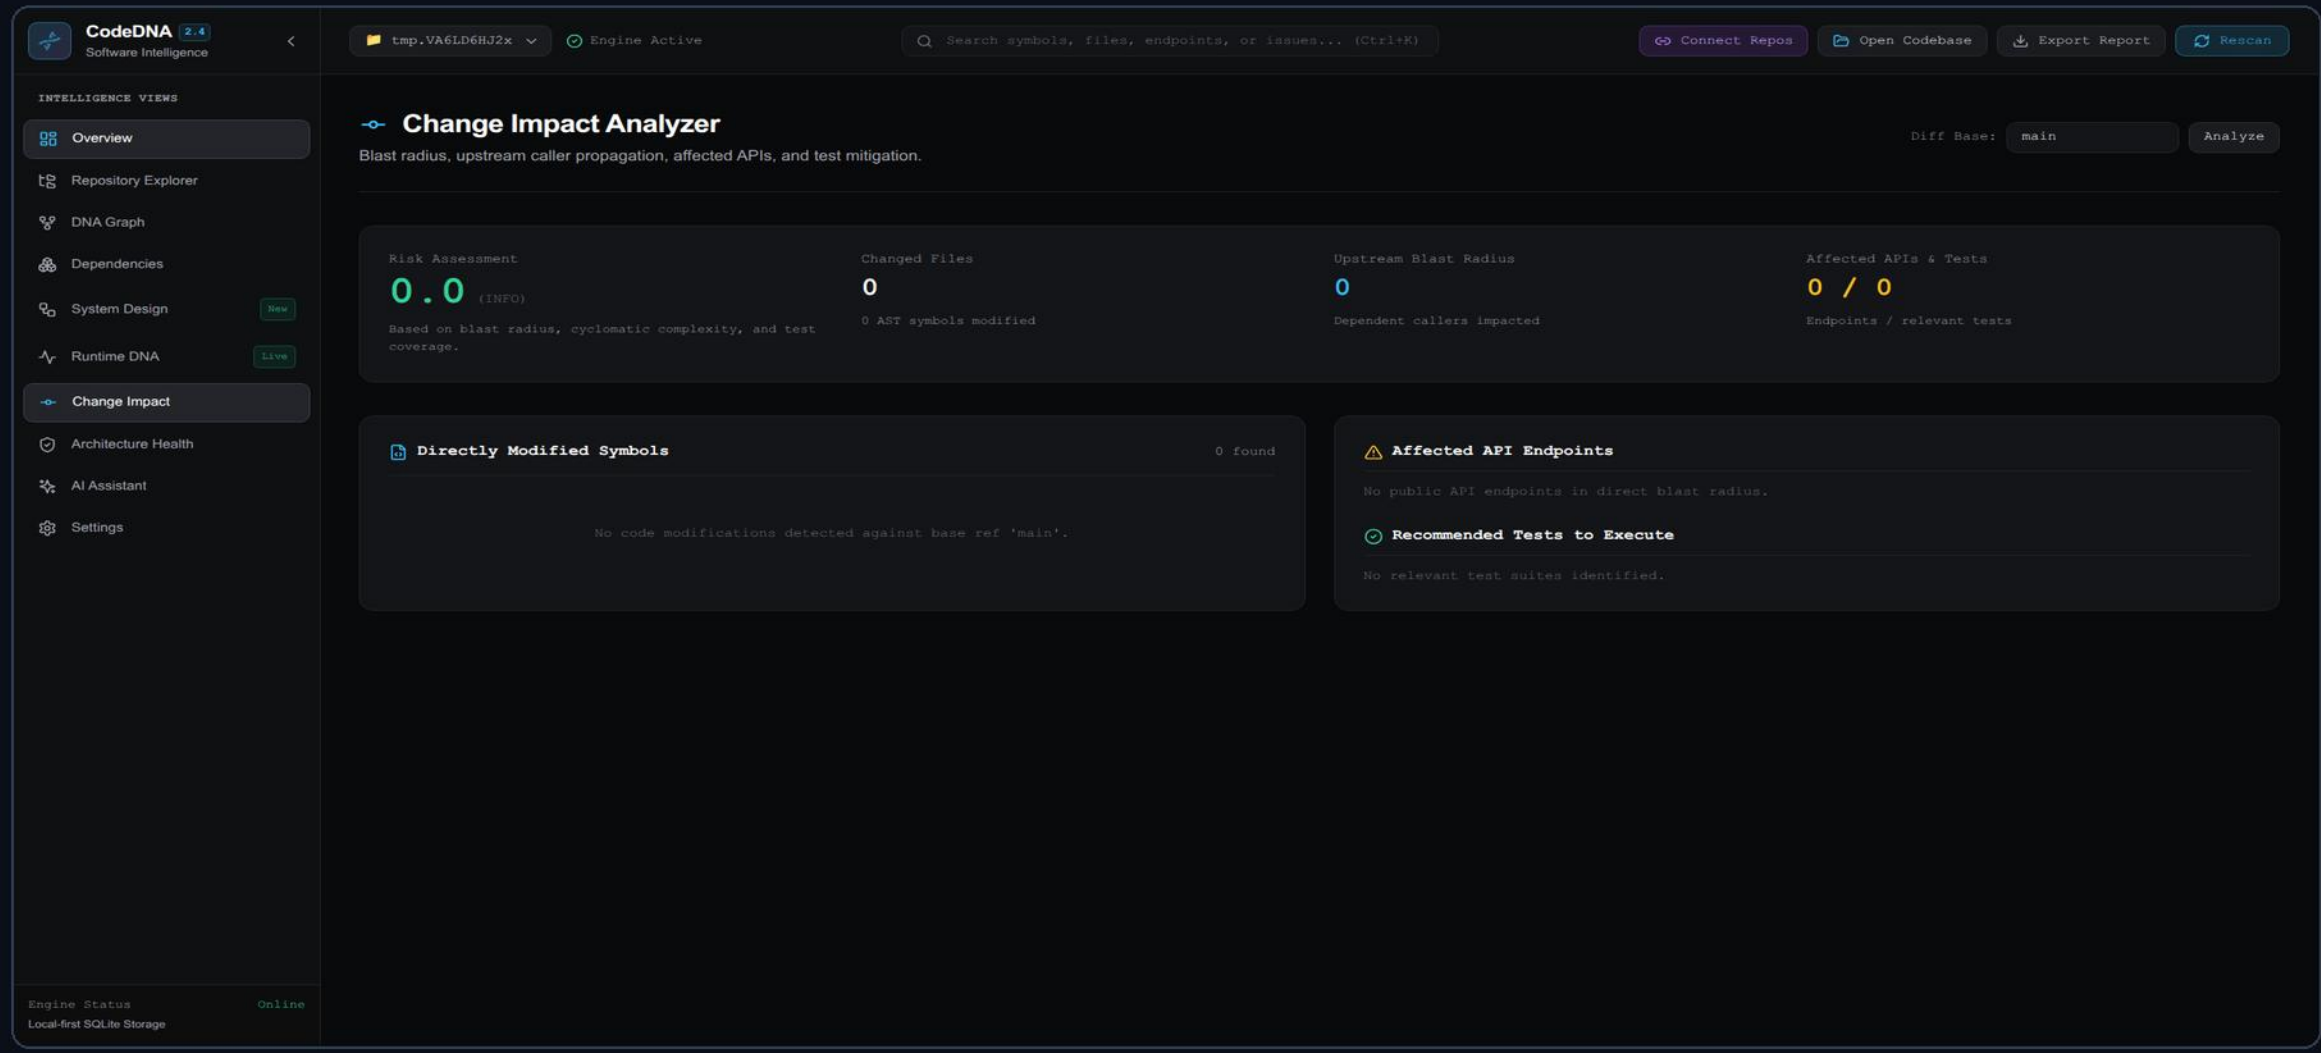

Auto-classifies components into Presentation, Application, Domain, and Infrastructure tiers.

CHANGE INTELLIGENCE

Git Blast-Radius Impact Analysis

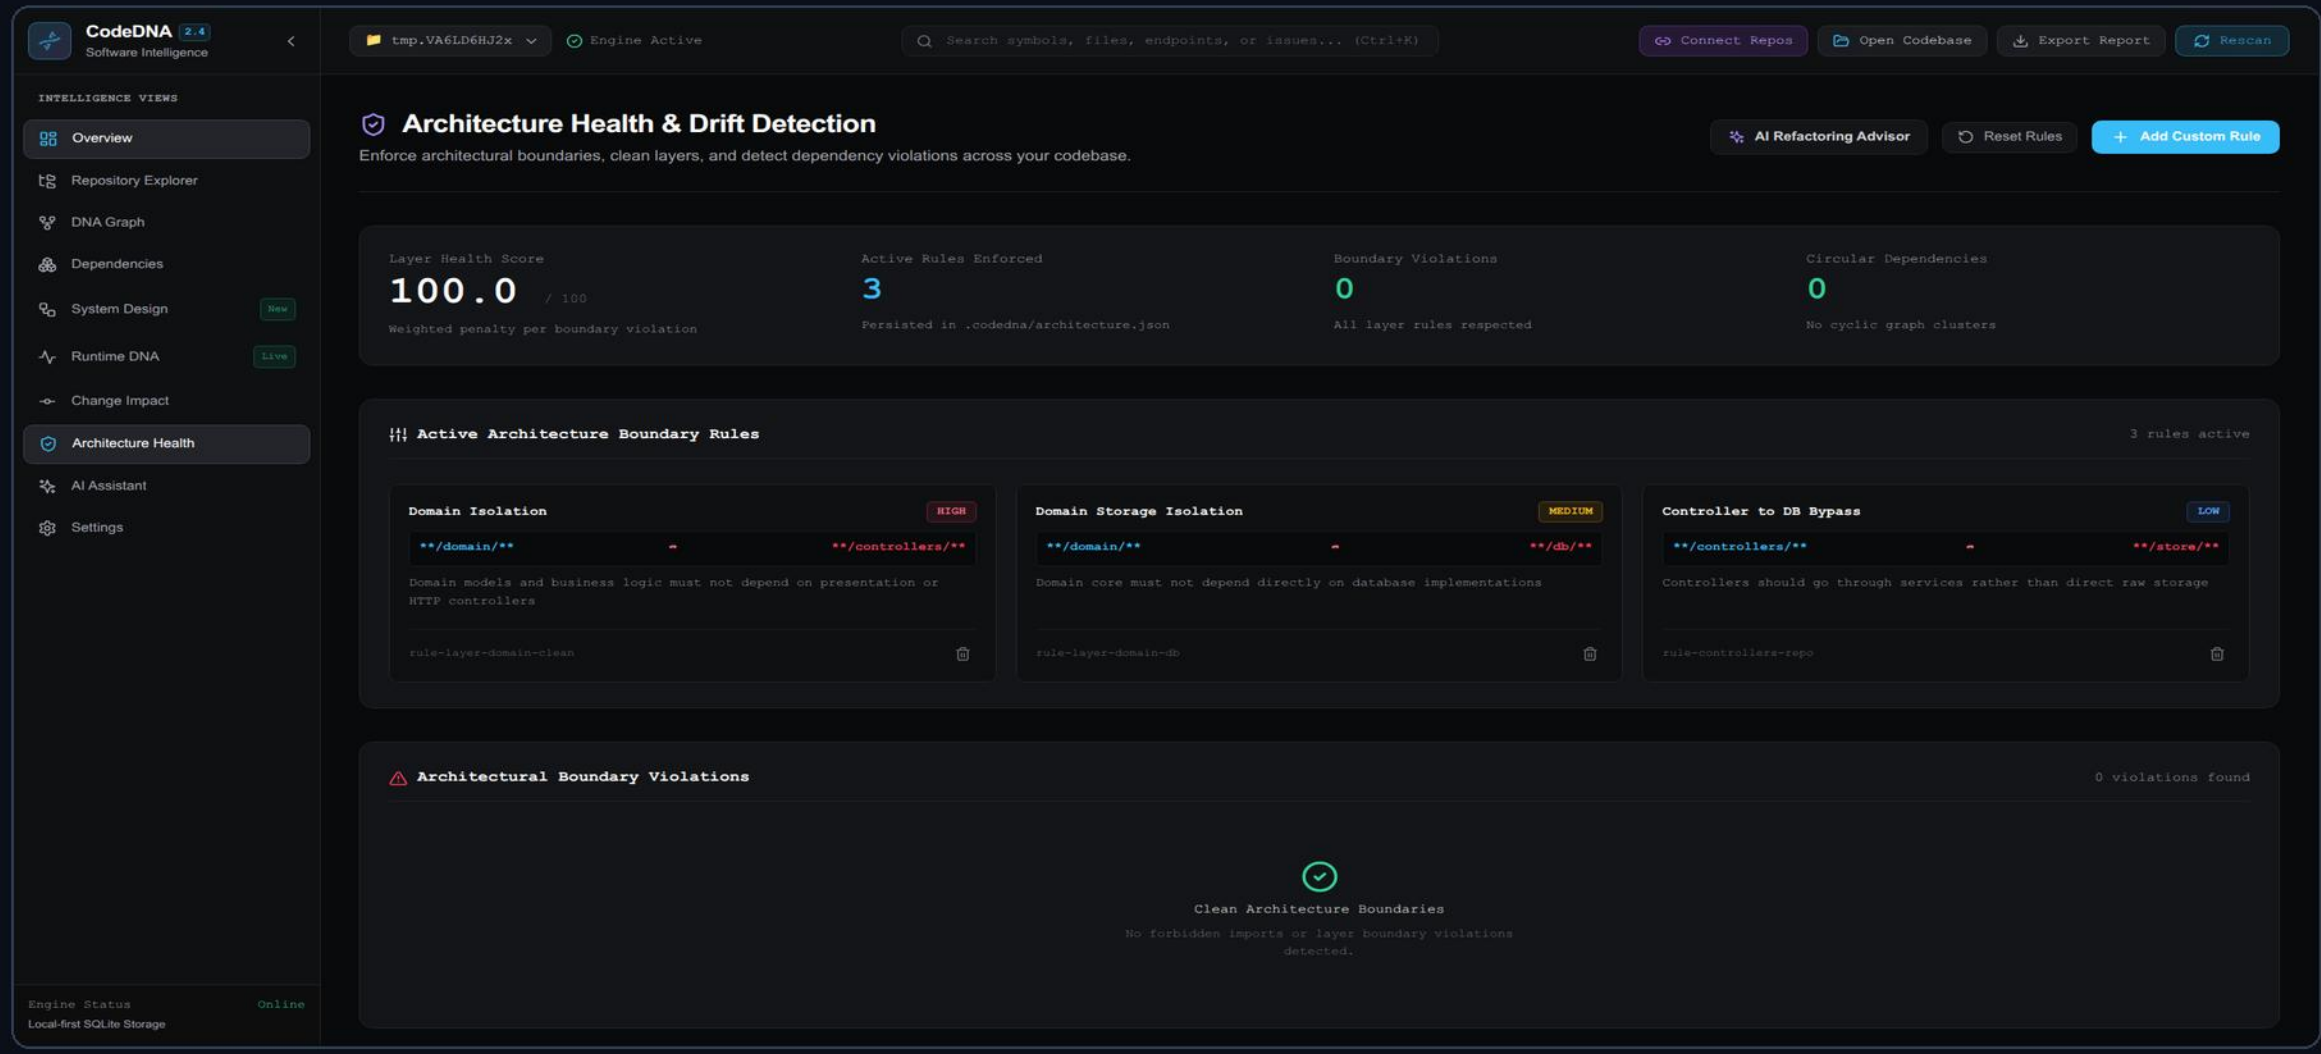

Calculates downstream risk scores and identifies impacted API routes before code hits production.

DRIFT GOVERNANCE

Architectural Guardrails & Layer Violations

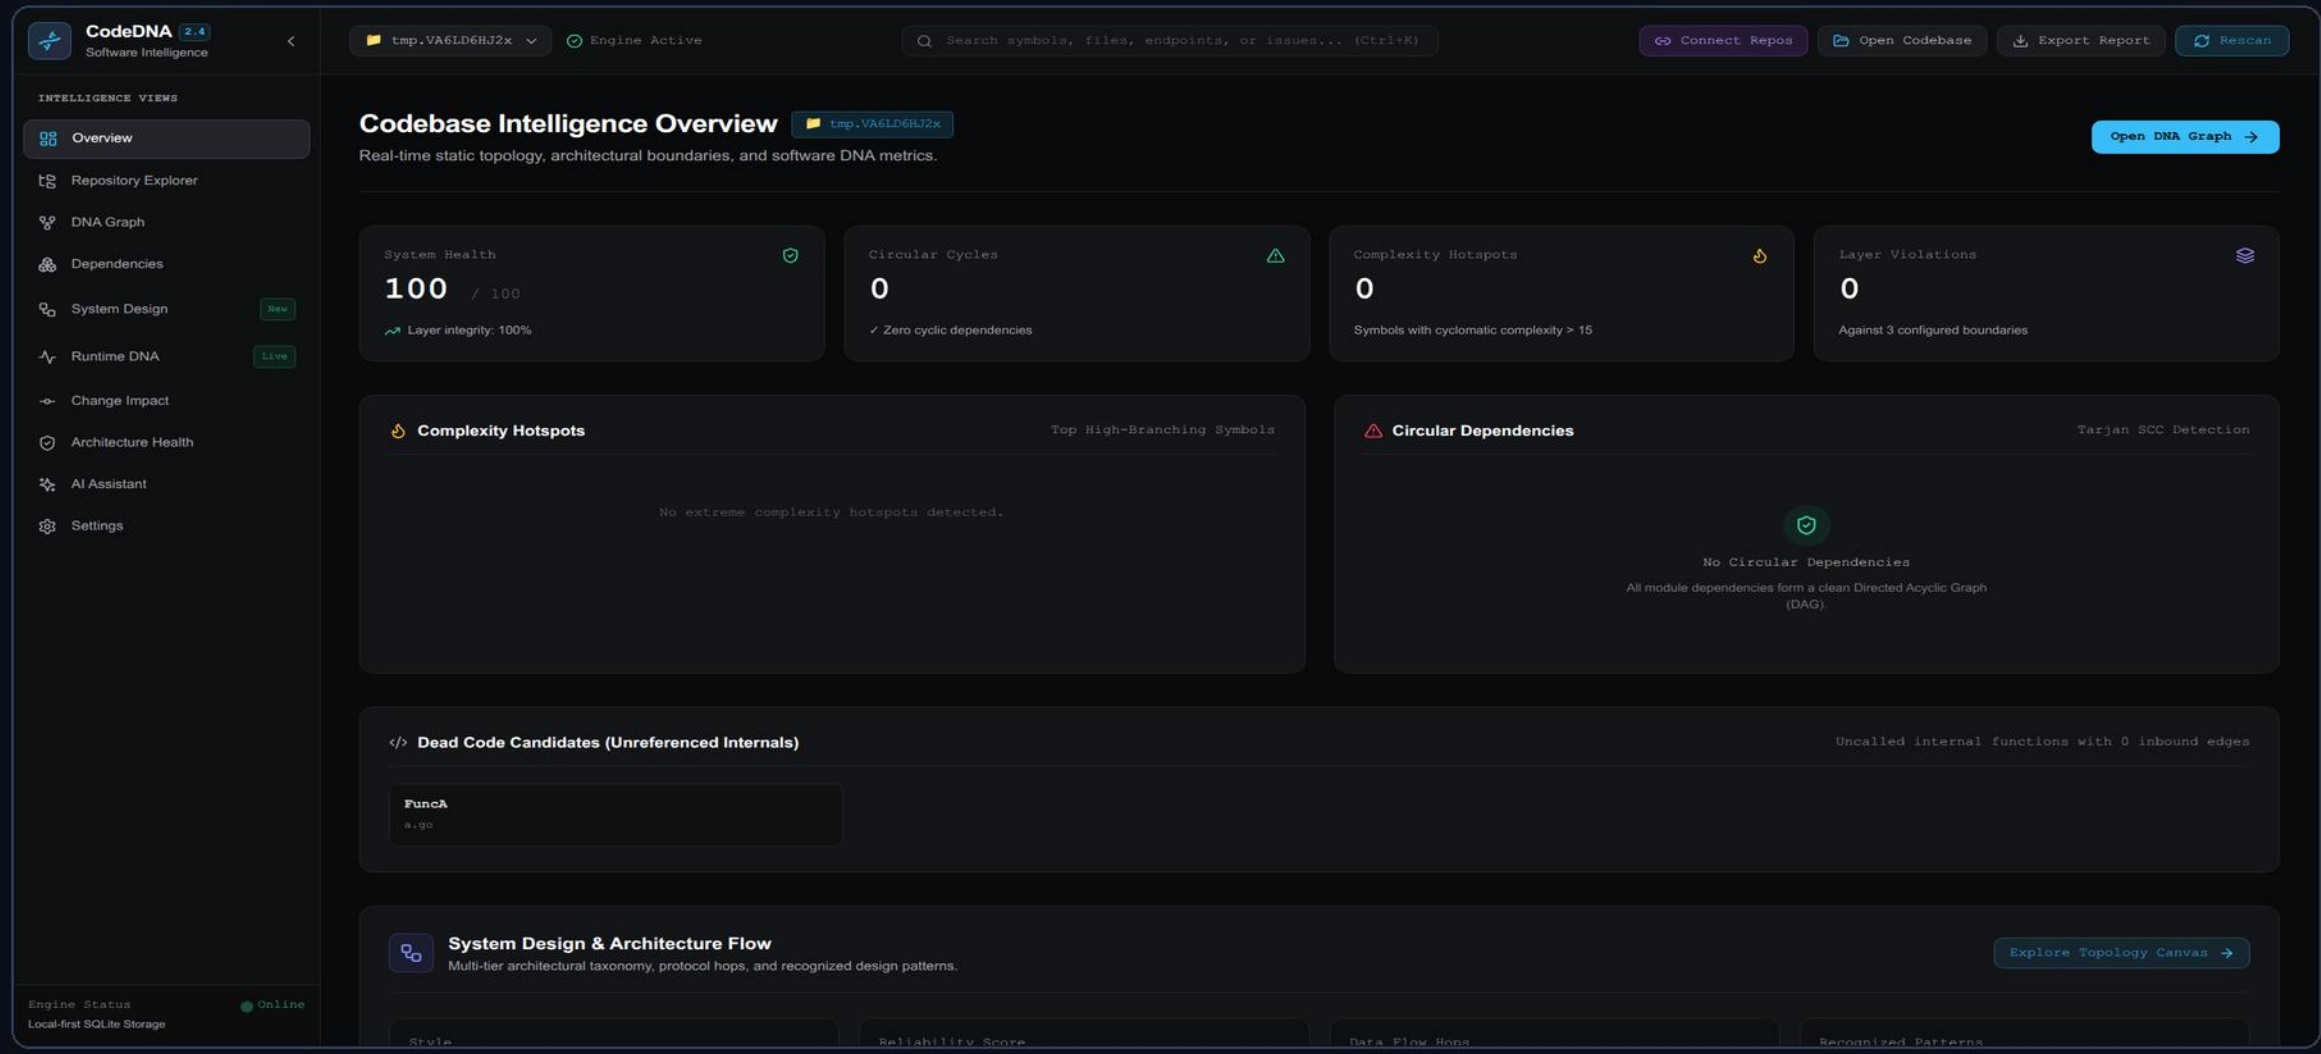

Enforce strict dependency rules to prevent architectural drift as teams and codebases scale.

LOCAL-FIRST & PRIVACY

AST Symbol Explorer & Zero-Cloud Quickstart

Runs 100% locally with embedded SQLite. Run with Docker or native one-line curl installer.

GitHub: github.com/0xzahed/codedna

docker run -d -p 8080:8080 -v $(pwd):/workspace ghcr.io/0xzahed/codedna
